

## **Students interested in joining the VEX VRC after school robotics teams:**

SF currently has 1 VRC (VEX Robotics Competition) team with 3 to 4 students per team. Additional teams may be added if there is serious interest.

**Mentor/Coach:** Team 2446A (Christ In Action): Carol Johnson

**Mentor/Coach:** Team 2446B

**Programming volunteer/Mentor:** Pricilla Walmsley

VEX VRC is a competitive after school program that has Required Attendance. Teams will build a robot that will compete in multiple middle school/high school tournaments, scrimmages and leagues. This year the game is:

## **Team Member Expectations:**

- Every team member will contribute to the engineering notebook through writing, sketches, charts and diagrams.
- Every team member will attend all practices and events that the team is signed up for.
- Every team will consist of: builders, coders and drivers. *While students may work primarily in one role, it is the expectation of SEAS that every team member be able to make contributions to every aspect of the robot.*
- Only students interested in working hard should sign up...no tom foolery!
- Every team member should work, as they are able, on VEX VRC over the summer through camps or independently.

SF VEX teams, competes within the Northern Michigan VRC Region and has a goal of doing well at every competition we attend. We do this by supporting students who work hard, encourage students to set high goals, and expect all students to be active team members who are held accountable for their team's performance. Please see the VEX Robotics REC Foundation Code of Conduct for more information on student expectations. <https://www.roboticseducation.org/documents/2018/05/rec-foundation-code-of-conduct.pdf>

There is a fee to join the team of \$85.00, the high school has paid for and designed their own team t-shirt. **If you are interested in joining please fill out the slip below and either bring to our first meeting September 9<sup>th</sup> or place in my mailbox. We will meet in our Robotics Room at SF.**

We are not registered for competitions at this time but will be getting the schedule as soon as possible. Keep an eye on our website: <https://gtacsvexrobotics.weebly.com/>

We will once again be hosting a tournament at SEAS. At this time I am thinking in February. I do not have the dates
